METALUXE

JANITORIAL & CLEANING EQUIPMENT

Professional hardware, cleaning equipment components and OEM manufacturing solutions.

BUILT FOR A CLEANER WORLD

Metaluxe supplies professional janitorial hardware and equipment components for distributors, cleaning companies, hospitality, facility management and OEM/private-label buyers.

PRODUCT RANGE
Mop Wringers • Telescopic Handles • Mop Holders • Cleaning Hardware • V Sweepers • Custom OEM Products

QUALITY FOCUS
Material inspection • Production inspection • Final product inspection • Packaging inspection

Product Range

A focused portfolio of professional cleaning equipment and metal hardware for commercial and OEM supply programs.

Mop Wringers

Professional mop wringing equipment engineered for dependable daily use in commercial and institutional cleaning environments.

Custom / OEM Products

Custom-manufactured janitorial hardware and metal components developed around buyer drawings, dimensions and application requirements.

Telescopic Handles

Adjustable cleaning handles designed to support flexible janitorial workflows and compatibility with a range of cleaning heads and tools.

Cleaning Hardware

A versatile range of metal cleaning hardware, mounting components and functional fittings for professional janitorial equipment.

Mop Holders & Clamps

Commercial mop holders, clamps and connection hardware designed for secure tool attachment and dependable daily cleaning performance.

V Sweepers

Professional V-shaped sweeping tools with robust metal frames, designed for efficient coverage and durable commercial cleaning use.

OEM / PRIVATE LABEL

Custom dimensions, fittings, finishes, packaging and product configurations can be developed against approved drawings, samples or buyer specifications. Exact technical values are confirmed during quotation and sample approval.

01 Mop Wringers

Professional mop wringing equipment engineered for dependable daily use in commercial and institutional cleaning environments.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Heavy-duty wringer assemblies for commercial janitorial operations.
• Stable metal frame with practical pressing mechanism and easy service access.
• Designed for repetitive cleaning workflows where durability and consistent operation matter.

Specifications

• Construction: Metal components with protective finish.
• Configuration: Manual wringing mechanism; multiple configurations available.
• Customization: Size, finish, fittings and OEM requirements available on request.
• Exact dimensions/material grades: confirmed against buyer specification.

Available Models

• Compact / Standard Wringer
• Heavy-Duty Commercial Wringer
• OEM Custom Configuration
• Private-Label Configuration

Packaging Information

• Protective individual wrapping for finished surfaces.
• Dividers / inner protection to reduce movement during transit.
• Export master cartons and palletization available.
• Packing method can be adapted to buyer and destination requirements.

METALUXE • Professional Janitorial Equipment & Hardware • Custom OEM / Private Label

02 Custom / OEM Products

Custom-manufactured janitorial hardware and metal components developed around buyer drawings, dimensions and application requirements.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Custom mop hardware, brackets, clamps, holders and specialized components.
• Suitable for OEM programs, private-label ranges and replacement-component supply.
• Manufacturing can be aligned to approved samples, drawings or reference parts.

Specifications

• Design basis: Buyer drawing, sample or agreed specification.
• Construction: Metal components selected for the application.
• Finish: Configuration/finish matched to approved requirement.
• Tolerance, dimensions and material grade: finalized during quotation.

Available Models

• Drawing-Based OEM Parts
• Sample-Matched Components
• Custom Brackets & Clamps
• Private-Label Hardware Programs

Packaging Information

• Component-specific protective packing.
• Count-controlled inner packs where required.
• Export cartons, labels and palletization available.
• Packaging artwork and private-label requirements can be accommodated.

03 Telescopic Handles

Adjustable cleaning handles designed to support flexible janitorial workflows and compatibility with a range of cleaning heads and tools.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Telescopic construction allows practical adjustment for different users and applications.
• Lightweight metal shaft with durable grip and locking sections.
• Suitable for commercial cleaning systems, facility maintenance and OEM programs.

Specifications

• Construction: Telescopic metal shaft with polymer grip/fittings.
• Adjustment: Multi-section telescopic configuration.
• Finish: Clean metallic shaft with durable black fittings.
• Length, tube diameter and fittings: customizable to approved specification.

Available Models

• Short-Reach Telescopic Handle
• Standard Telescopic Handle
• Extended-Reach Handle
• OEM Custom Length / Fitting

Packaging Information

• Protective sleeves/bundles to prevent surface damage.
• Inner grouping for efficient carton packing.
• Export cartons and pallet loading available.
• Custom carton labels and barcodes available for OEM orders.

04 Cleaning Hardware

A versatile range of metal cleaning hardware, mounting components and functional fittings for professional janitorial equipment.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Precision-formed hardware for cleaning tools, frames and equipment assemblies.
• Includes tube sockets, brackets, adjustable fittings and mounting components.
• Designed for dependable assembly, replacement and OEM integration.

Specifications

• Construction: Metal hardware; exact grade selected per application.
• Forming: Cut, formed, drilled and assembled configurations available.
• Finish: Metallic protective finish or buyer-specified finish.
• Dimensions and hole patterns: produced to approved drawings/specifications.

Available Models

• Tube Sockets & Ferrules
• Mounting Brackets
• Adjustable Fittings
• Custom Fabricated Hardware

Packaging Information

• Small components separated into protective inner packs.
• Surface protection for finished metal parts.
• Master cartons sized to minimize movement in transit.
• Export packing and palletization available on request.

METALUXE • Professional Janitorial Equipment & Hardware • Custom OEM / Private Label

05 Mop Holders & Clamps

Commercial mop holders, clamps and connection hardware designed for secure tool attachment and dependable daily cleaning performance.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Range of holder and clamp configurations for professional cleaning tools.
• Secure connection points support consistent attachment to handles and equipment.
• Suitable for distributors, facility-management suppliers and OEM programs.

Specifications

• Construction: Metal body/components with durable fittings.
• Configuration: Fixed, adjustable and clamp-style options.
• Compatibility: Tube sizes, mounting patterns and fittings can be specified.
• Exact material grade and dimensions: confirmed with approved specification.

Available Models

• Flat Mop Holders
• Adjustable Mop Clamps
• Wall / Equipment Mount Holders
• OEM Custom Holder Systems

Packaging Information

• Individual or grouped protective packing depending on product geometry.
• Nested packing for selected components to improve carton efficiency.
• Export master cartons and palletization available.
• Buyer-specific labels, quantities and carton marks supported.

06 V Sweepers

Professional V-shaped sweeping tools with robust metal frames, designed for efficient coverage and durable commercial cleaning use.

OEM-READY

Suitable for distributor, commercial cleaning and private-label supply programs.

SPECIFICATION NOTE

Product dimensions, material grades, finishes and packing quantities are finalized against the approved buyer specification.

Product Details

• Wide sweeping profile supports fast coverage of larger floor areas.
• Rigid metal construction with reinforced joints for repeated commercial use.
• Suitable for warehouses, facilities, hospitality and institutional cleaning.

Specifications

• Construction: Metal frame with durable cleaning edge/bristle assembly.
• Design: V-shaped sweeping head for broad floor coverage.
• Handle: Compatible handle configurations can be specified.
• Working width, handle length and finish: customizable to buyer requirement.

Available Models

• Standard V Sweeper
• Wide-Coverage V Sweeper
• Heavy-Duty Commercial Version
• OEM / Private-Label Version

Packaging Information

• Components protected against scratching and deformation.
• Handles and heads can be packed separately where required.
• Export cartons and palletized loading available.
• Custom carton labels and private-label packaging supported.

METALUXE

Janitorial & Cleaning Equipment

MANUFACTURING & OEM
Custom product development, approved-sample production, private-label programs and buyer-specific configurations.

QUALITY CONTROL
Material inspection • Production inspection • Final product inspection • Packaging inspection

GLOBAL SUPPLY
Export-oriented packing, documentation support and shipment-ready preparation according to buyer requirements.

PRODUCT INFORMATION NOTE

This catalogue presents representative product configurations. Final material grades, dimensions, tolerances, finishes, models, quantities and packaging are confirmed with the buyer before production.
